1 Instrument Panel

1.1 Overview of Instrument Panel

1. Preset Bar
2. Tuner
3. Position Assignment
4. Note Information
5. Pick Attack Accentuate Ratio
6. Pick Attack Accentuate Ratio Humanization
7. String Assignment Display

1.2 Preset Bar

There are four buttons: Previous , Next , Play , and Save .

Clicking the preset name text box will open the preset file list window.

1.3 Tuner

You can tune every string by turning its corresponding tuner, 2 semitones down at most.

2 Main Panel

2.2 Articulations & Poly Legato

2.2.1 Articulation List

Abbr.	Full Name	Keyswitch	Range
Sus	Sustain & Pop	C0	C1-C5
NH	Natural Harmonic	C#0	C1-A4
PM	Palm Mute	D0	C1-C5
SIO	Slide In & Slide Out	D#0	D1-C5
LS	Legato Slide (Poly Legato)	E0	C#1-C5
HP	Hammer-On & Pull-Off	F0	C#1-C5
Tap	Tap	F#0	C1-C5
PH	Pinch Harmonic	G0	C1-C5

2.2.2 Sustain & Pop

Keyswitch is C0.

In metal guitars, the sustain articulation combines sustained notes with palm mutes to

accommodate the frequent switching typical of metal riffs.

- Velocity 1–15: triggers Full Mute
- Velocity 16–31: triggers 3/4 Mute
- Velocity 32–63: triggers Half Mute
- Velocity 64–126: triggers Sustain
- Velocity 127: triggers Pop or Pinch Harmonic (depending on the Settings)

2.2.3 Natural Harmonic

Keyswitch is C#0.

2.2.4 Palm Mute

Keyswitch is D0.

Lower the velocity, greater the mute depth.

2.2.5 Slide In & Slide Out

Keyswitch is D#0.

- Press D#0 then play a note (above fret 2) will trigger Slide In.
- Press D#0 while a note (above fret 3) is playing will trigger Slide Out.
- Reverts to Sustain automatically.

2.2.6 Legato Slide (Poly Legato)

Keyswitch is E0.

- Press E0 then play two overlapping notes will trigger slide between the notes.
- Support controllable slide speed (by note velocity) and intervals.
- Reverts to previous articulation automatically after slide.
- E0 with high velocity will change position. Otherwise the position will not be changed by slide.

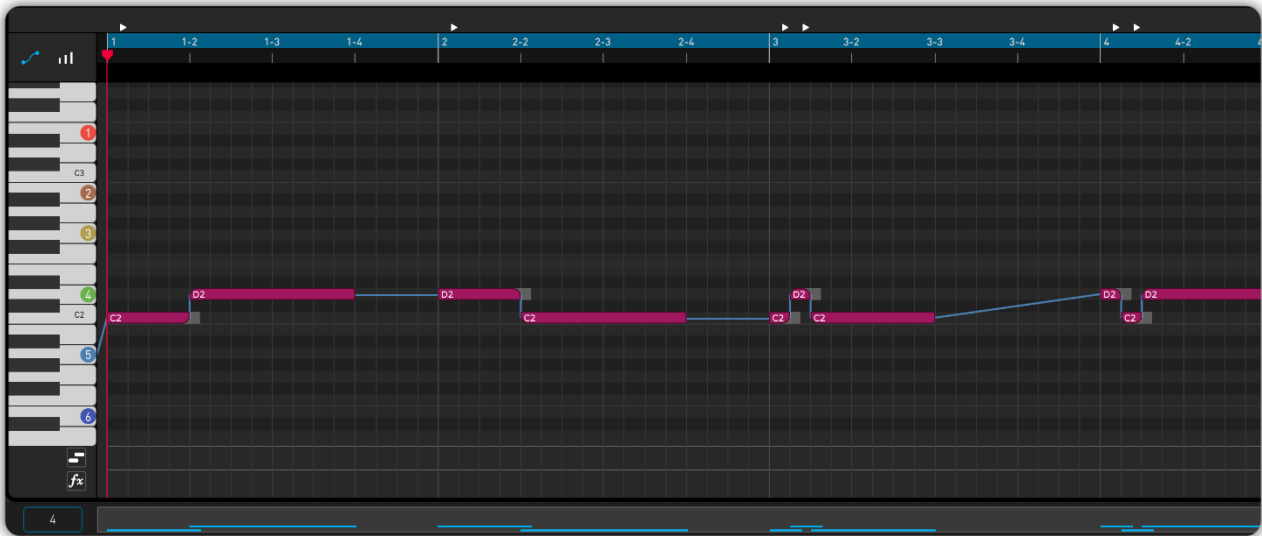

Poly Legato: Play multiple start notes on different strings at the same time, then play a higher or lower destination note. All start notes on different strings will trigger slides of the same interval, performing polyphonic legato.

Slide Smoother: For slides over two frets, the destination note's velocity determines the slide speed. Higher the velocity, faster the speed.

2.2.7 Hammer-On & Pull-Off (Poly Legato)

Keyswitch is F0.

- Press F0 then play two overlapping notes will trigger HP between the notes.
- Reverts to previous articulation automatically after HP.
- F0 with high velocity will change position, otherwise the position will not be changed by HP.

Poly Legato: Play multiple start notes on different strings at the same time, then play a higher or lower destination note. All start notes on different strings will trigger HP of the same interval, performing polyphonic legato.

2.2.8 Tap

Keyswitch is F#0.

2.2.9 Pinch Harmonic

Keyswitch is G0.

2.2.10 Doubled Keyswitches

Pressing two articulation keyswitches simultaneously will combine both articulations in performance.

C0 and D0 pressed together: Notes of high velocity will be Sustain and notes of low velocity will be Palm Mute.

* If you have questions about articulations or legato techniques, it is recommended to use Riffer for MIDI creation and editing. Once finished, simply drag Riffer directly into the host's MIDI track.

2.3 Sound Mode

Mono and Stereo DI modes are available.

1.  Stereo
2.  DI

2.4 Doubled Guitars

Two guitars (left and right) can trigger different samples. The knob adjusts the stereo width between the two guitars.

2.5 Rich Fingering Sound

Simulates the variety of fret noises that naturally occur during real performance.

FR: Noise of fingers releasing from the string.

2.6 Capo

It simulates the real bass capo. It can transpose the pitch without changing the fingering.

2.7 Position Mode

Two position modes are available:

1. 
Melody Mode: Covers three octaves, suitable for melodic playing.
Keyswitch: B6 low velocity.
2. 
Chord Mode: Each position spans five frets, suitable for chord playing.
Keyswitch: B6 high velocity.

2.8 Open String First

C1 G1 C2 F2 A2 and D3 6 notes will be played on open strings.

It can be toggled on with note G#6, High velocity toggles on, Low velocity toggles off.

2.9 Play Mode

Instrument Mode:  Constrained by real instrument rules (e.g., two notes on the same string cannot sound simultaneously).

Keyboard Mode:  Not limited by real instrument rules.

Solo Mode:  Allows only monophonic playing.

Power Chord (Fifth) Mode:  Plays the root and the fifth simultaneously.

Octave Mode:  Plays the root and the octave simultaneously.

* Keyboard Mode and Solo Mode will both disable automatic legato.

2.10 Auto Legato Mode

There are 3 modes: Automatic Slide; Automatic Hammer On and Pull Off; Off.

*High velocity D#6 turns on Automatic Slide mode; Low velocity D#6 turns on Automatic Hammer-On & Pull-Off mode.

2.11 Stroke Noise

A strummed noise will be generated automatically for polyphonic notes.

2.12 Vibrato Wheel

The default is Auto Vibrato Mode.

To change parameters such as vibrato depth or speed, adjust them in Settings.

When the vibrato depth in Settings is set to ≥ 0.75 , a vibrato noise will be triggered.

2.13 String Assignment and Position Assignment

2.13.1 String Assignment

Specify a string to be played. F#1-B-1 correspond to 6th string-1st string. High velocity String Force will affect fret position, while low velocity will not.

2.13.2 Position Assignment

Switch to a fret position manually. A yellow line will be displayed after pressing G#0, notifying the notes that represent positions from 0 and up, then press the position note (C1-F#2) to switch to a particular position.

*A position covers a range of 5 frets (12 frets in Melody mode).

2.14 FX Sound Group

Note	FX Sound
F5	Scratch

F#5	Slap
G5	Muting
G#5	Strum Mute
A5	Downstroke Noise 1
A#5	Upstroke Noise 1
B5	Downstroke Noise 2
C6	Upstroke Noise 2
F6	Pick Scrape
F#6	FX Slide 1
G6	FX Slide 2

2.15 Note Repeater

Press D6 to repeat notes being played. Multiple notes are supported.

2.16 Hold Pedal Toggle
